Foreword	xxi
The Changing Face of Satellite Dual Usage: An Introduction	
<i>Péricles GASPARINI ALVES</i>	1
I. A Revolution in Satellite Technologies and Applications?	2
II. The Growing Synergy Between Civilian and Military Uses of Satellites	4
III. Dual-Use Satellites: Policy Issues Beyond 1995	10
IV. New Co-operation Challenges in the Development and Use of Satellites	17
Part I: Present and Prospective Applications of Satellite Technology	19
Chapter 1: Satellite Capabilities of Established Space-Competent States	
<i>Masashi MATSUO</i>	21
I. Introduction	21
II. Establishing Basic Requirements for the Verification of Security-Related Agreements	22
1. Purpose	22
2. Characteristics	23
3. Verification Items	24

III.	Satellite System Technology	24
1.	Outline	24
2.	Earth Resources Satellites	25
3.	Military Photo-Reconnaissance Satellites	27
4.	Disaster Monitoring and Earth Environment Monitoring Satellites ..	27
IV.	Conceiving a Disarmament Satellite System	28
V.	Implementation Programme	28
1.	Architecture Requirements	29
2.	Necessary Conditions	29
3.	Major Elements	29
VI.	Conclusions	30

Chapter 2: Satellite Capabilities of Emerging Space-Competent States

Gerald M. STEINBERG 31

I.	Introduction	31
II.	Capabilities	33
	1. India	34
	2. Israel	38
	3. Brazil	43
	4. Indonesia	45
	5. South Africa	46
	6. South Korea	46
	7. Pakistan	47
III.	Implications of Dual-Use Satellites for Regional Stability	48
IV.	Conclusions	55

Chapter 3: Current and Future Remote Sensing Data Markets

Arturo SILVESTRINI and Richard MROCZYNski 57

I.	Earth Observation: Pacing the Growth in Space	57
II.	Confluence of Technology	59

<i>Table of Contents</i>	vii
)))	
III. Change in Attitude and Policy	59
IV. Impediments	59
V. Advances	60
VI. Conclusions	61
Part II: Civilian Applications of Satellite Technology	63
Chapter 4: Prevention of, Preparedness for, and Relief of Natural Disasters	
<i>Olavi ELO</i>	65
I. Natural Disaster Dimension	65
II. Disaster Prevention, Preparedness and Response	67
III. International Action	69
IV. Disaster Reduction	70
V. Space Technologies	72
Chapter 5: Satellite Data and Man-Made Events	
<i>Giovanni CANNIZZARO and Paolo CECAMORE</i>	77
I. Introduction	77
II. Satellite Remote Sensing and Derived Basic Products	77
1. Satellite Remote Sensing: General Characteristics	77
2. Remote-Sensing Satellites	78
3. Base Products	82
III. Applications for Event Monitoring	83
1. Inland Waters	84
2. Marine and Coastal Areas	87
3. Forest Fires	88
4. Geology	89

IV. Conclusions	90
-----------------------	----

Chapter 6: New Civilian Applications of Satellite Data

Kiran KARNIK

I. Introduction	91
II. Genesis of Remote-Sensing in India	91
III. Applications of Remote-Sensing Data	92
IV. National Natural Resources Management System	94
V. Integrated Mission for Sustainable Development	95
VI. Facilities and Infrastructure for Remote-Sensing	96
VII. "New" Applications and Their Needs	98
VIII. Issues and Implications	100

Part III: Military-Related Applications of Satellite Technology

103

Chapter 7: Conflict Prevention and Crisis Management

Ignacio BARBUDO ESCOBAR

I. Introduction	105
II. Crisis and Crisis Management: Concept	105
III. Old Style Crisis	106
IV. Regional Instability Crisis	107
V. Conclusions	108

Chapter 8: Verification of Agreements on Arms Limitation and Disarmament

Claude JUNG

109

<i>Table of Contents</i>	ix
)))	
I. Introduction	109
II. Foreseeable Developments	109
III. Present Civilian-Satellite Verification Capabilities	116
Chapter 9: Dual-Use Satellites: Military Applications and Strategic Implications	
<i>Stanislav N. RODIONOV</i>	119
I. Military Applications	119
II. Strategic Implications	121
Part IV: Civilian and Military Satellite Systems: Policy Issues Beyond 1995	123
Chapter 10: The Argentine National Space Plan	
<i>Genaro Mario SCIOLA</i>	125
I. Background	125
II. National Commission on Space Activities	125
III. The National Space Plan	127
1. Contents	127
2. Main Programmes	128
IV. Budget	128
V. Domestic Rate of Return	129
VI. Conclusions	129
Chapter 11: The Romanian Space Programme	
<i>Ion-Alexandre PLAVICIOSU</i>	131
I. The Origin of the Romanian Space Agency	131
II. The Romanian Space Programme	131

III.	Dual-Use Satellite Applications	132
IV.	Conclusions	133
Chapter 12: Policy Orientations of Space Agencies: The French Example		
Jean-Daniel LEVI		135
I.	Historical Background	135
II.	Experience in Joint Civilian/Military R&D	135
III.	Conclusions	137
Chapter 13: Economic Interests and Military Space Systems: An American Perspective		
Scott PACE		139
I.	Introduction	139
II.	Trends in US Military Space Systems and Operations	140
III.	Economics and National Military Strategy	141
IV.	Economic Issues in Space Power	142
V.	Economic Issues Affect Military Space Operations Today	143
VI.	Integrating Economic and Military Space Interests	144
VII.	Integrating Economic and Military Space Strategies	145
VIII.	International Law and Regulation Issues	146
IX.	Conclusions	147
Part V: Regional and Global Satellite Systems: Policy Issues Beyond 1995		
149		
Chapter 14: Regional Organizations: The Experience of the Western European Union		

<i>Table of Contents</i>	xi
)))	
<i>Horst HOLTHOFF</i>	151
I. Introduction	151
II. The New Strategic Context	152
III. Space-based Co-operation in WEU	153
1. The WEU Satellite Centre in Torrejon	153
2. The Feasibility Study for the Creation of a European Earth Observation System	154
IV. Conclusions	155
Chapter 15: UNISPACE III: An Expression of Diplomacy for Development	
<i>Raimundo GONZALEZ ANINAT</i>	157
I. Introduction	157
II. UNISPACE 82: Major Developments	159
III. Regional Co-operation	163
IV. Implications of Space Technology for International Security	165
V. Confidence-Building Measures and Outer Space	168
VI. Conclusions and Recommendations	169
Conclusions: Tomorrow's Dual Use of Satellites	
<i>George William HOPKINSON, Hubert KNIRSCH, and Péricles GASPARINI ALVES</i>	173
I. Evolving Trends: New Access to Satellite Technology and Data	173
II. The Changing Role of Satellite Applications: From Dual to Multiple Use	174
III. Control Regimes and Technology Diffusion	176
IV. Moving Forward	177

xii	<i>Evolving Trends in the Dual-Use of Satellites</i>
