# Cyber Policy Portal

An interactive guide and confidence-building tool for policymakers

An interactive "at-a-glance" tool, offering critical information in the cybersecurity policy arena.

Maps the cyber-security policy landscape across multistakeholder instruments and other initiatives.

Individual profiles summarise and link key cyber strategy documents, agencies, legislation and multilateral agreements.
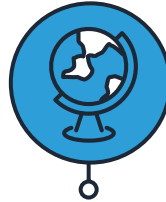

Allows easy gap analysis of progress in selected criteria across states and regions.

Draws data from official open source and voluntarily submitted material, with links to the primary sources.

Serves as a metric for progress of the cyber engagement of States, regions and IGOs.

Available in all UN official languages, enhancing transparency and information sharing across a global audience.

Includes international and regional organisations

Organizations

Organization profiles relate the cybersecurity measures undertaken by a selection of intergovernmental entities. These measures include guideline documents, declarations, meetings and activities, and other initiatives therein, aimed to strengthen capacity, to foster common understandings and shared norms, and to enhance trust and cooperation. Building on UNIDIR's research and advisory work in the field, these profiles seek to fulfill policymakers' need for complete, concise, accurate, and unbiased information regarding organization-level cyber practices.

- Le document expose les principes fondamentaux et les orientations de la politique de sécurité tchèque qui s'imposent à tous les organes de l'État et de l'administration publique. La stratégie de sécurité doit servir de guide pour les décisions stratégiques ainsi que pour le travail quotidien à tous les niveaux du système de sécurité, y compris les niveaux les plus fondamentaux. Sa mise en œuvre sera régulièrement revue en coopération avec les autorités compétentes.
- La cybersécurité figure parmi les domaines de préoccupation stratégique.

Content search

Content Search

Search the content of summaries and titles on individual profiles. You may specify whether you wish to search only in states or organisations profiles. To view the complete profiles, please visit the map and click on the browse button. The order of the results is determined by **BM25 method** – term frequency, inverse document frequency, field length.
